Anterior view of the skeleton of a man. The bones of the left forearm and hand are in the position of pronation.

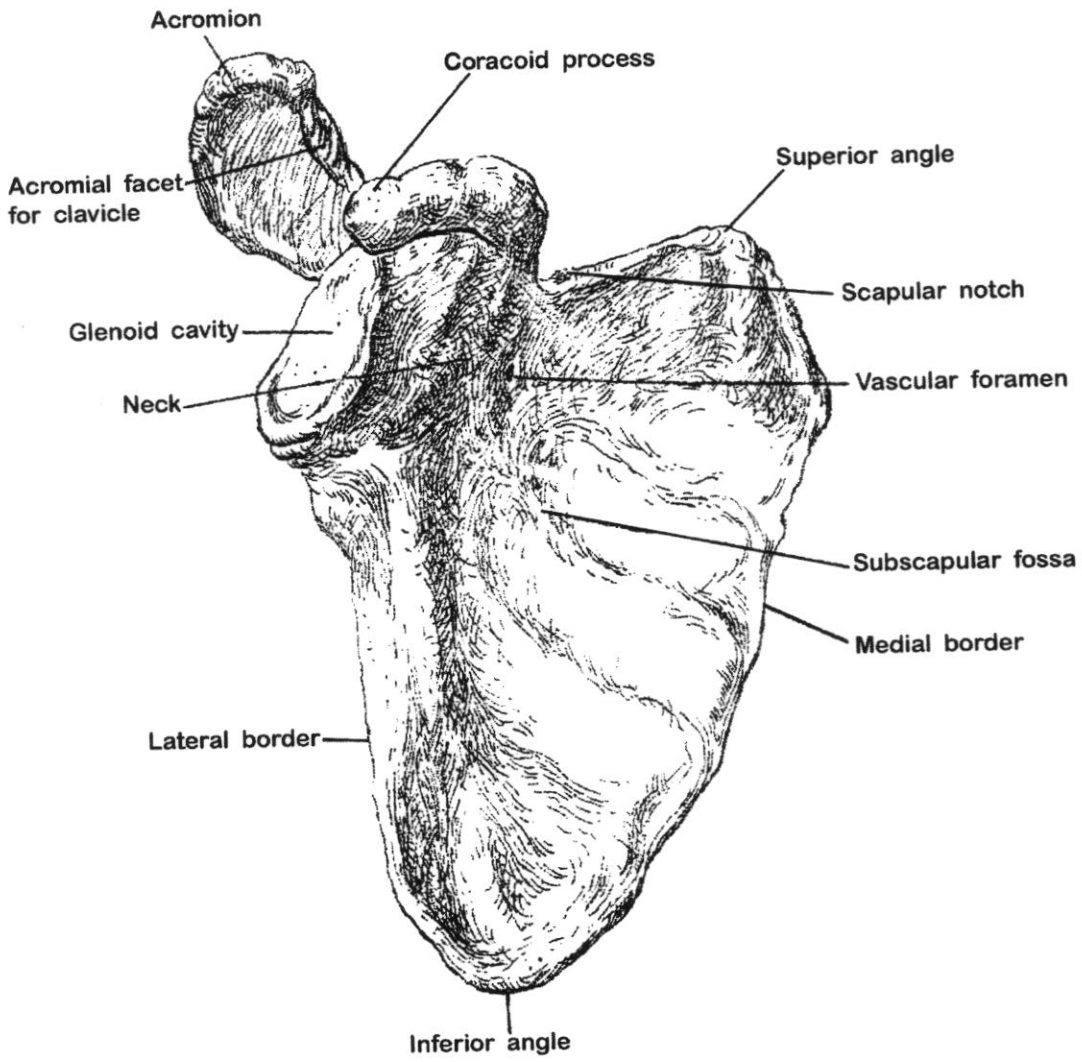

Posterior view of the skeleton of a man. The bones of the left forearm and hand are in the position of pronation.

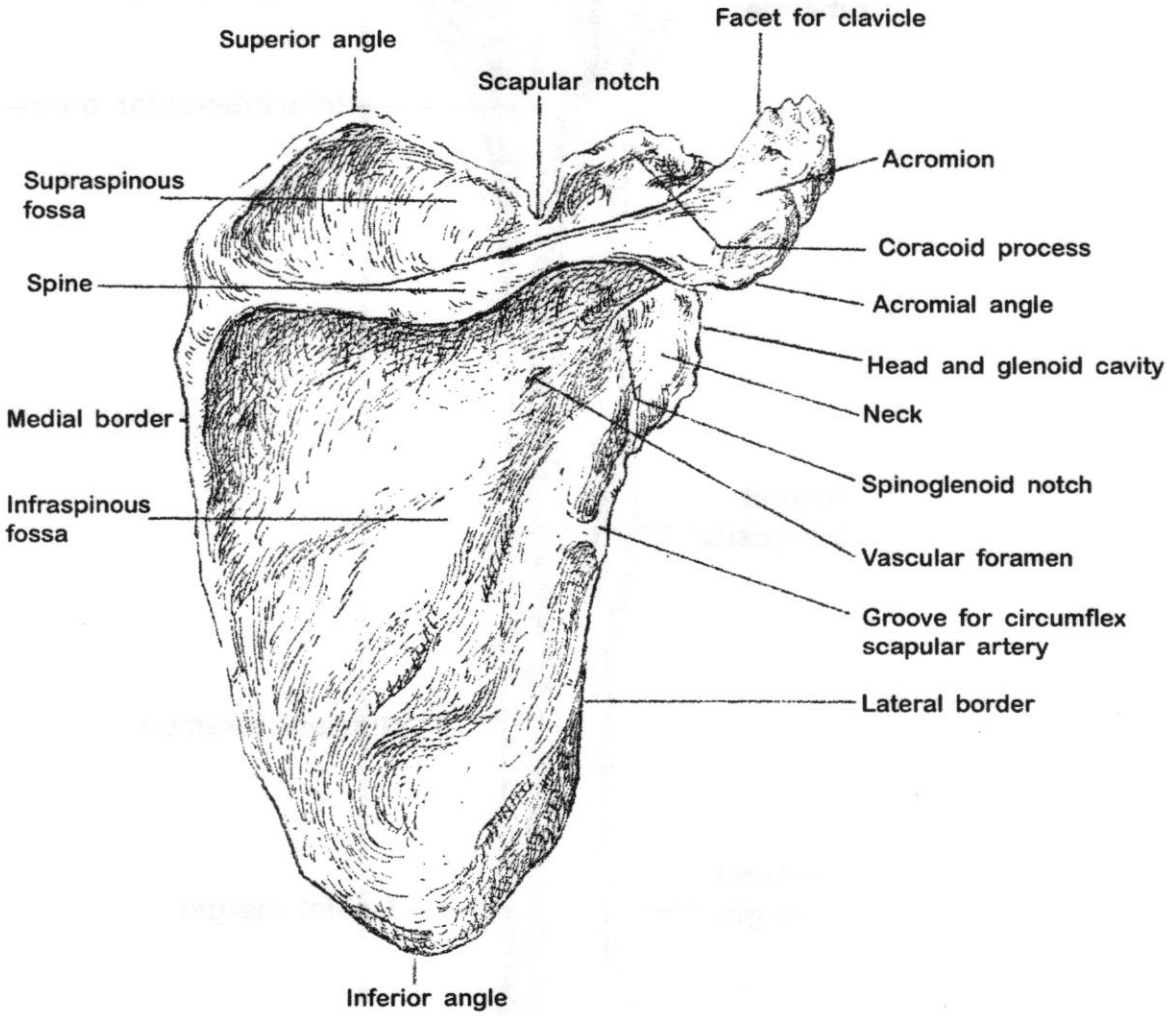

Right clavicle (superior surface)

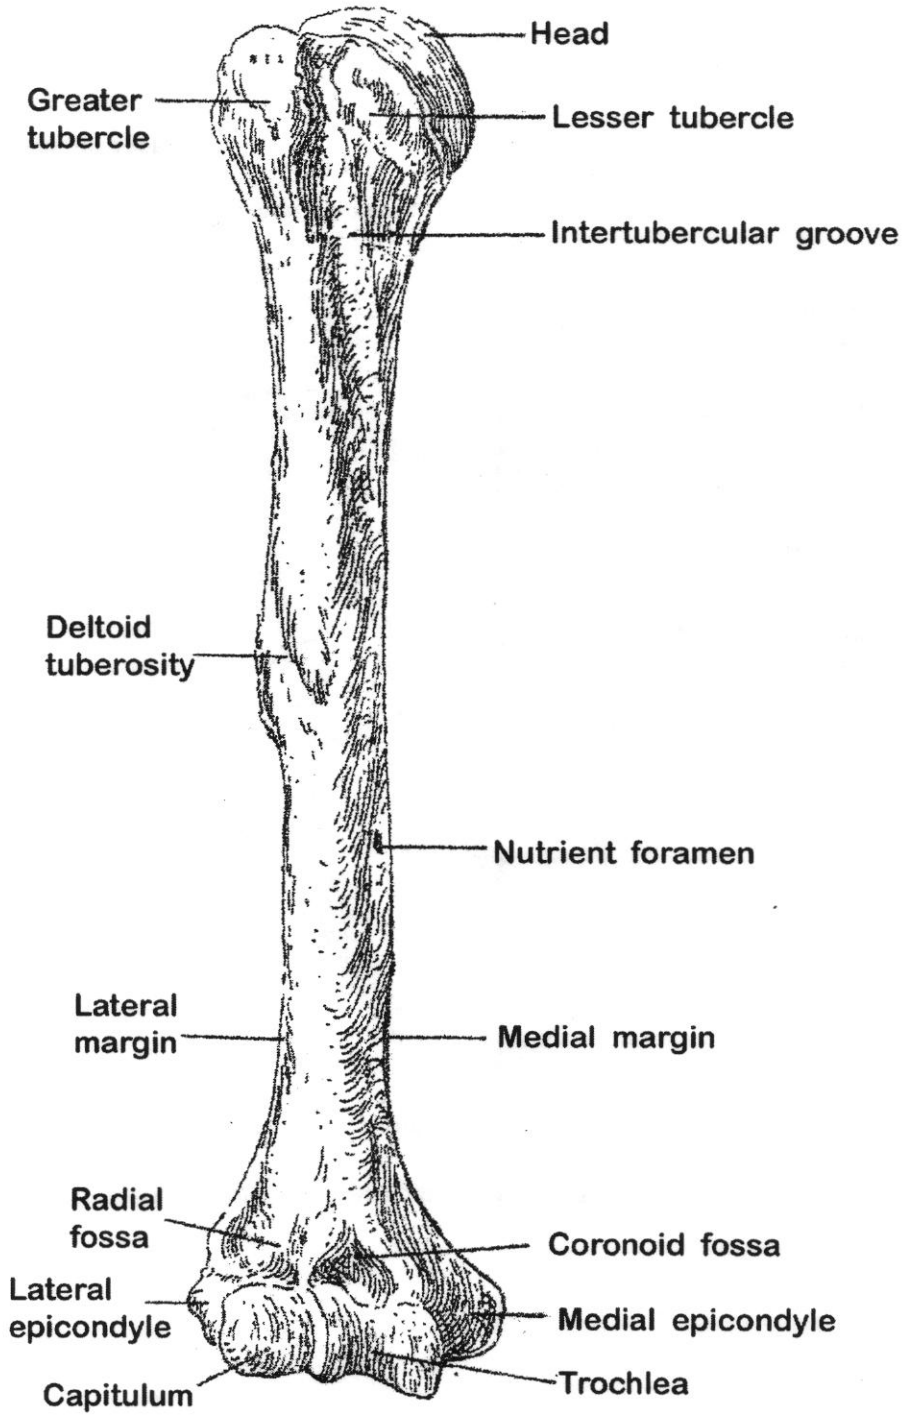

Right clavicle (interior surface).

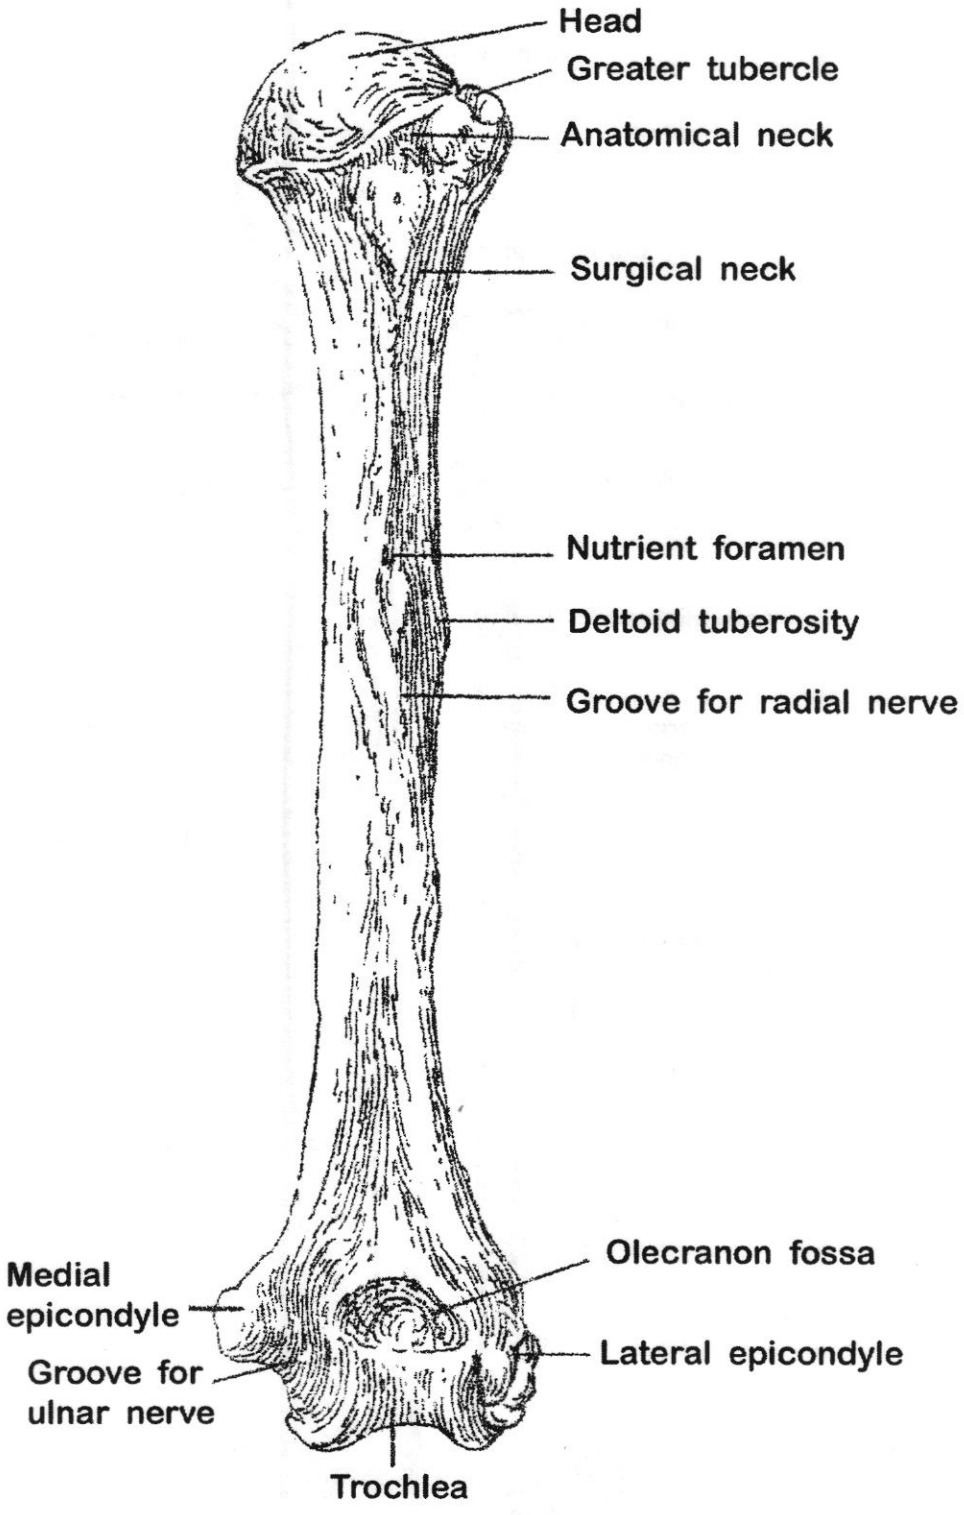

Right scapula (costal aspect).

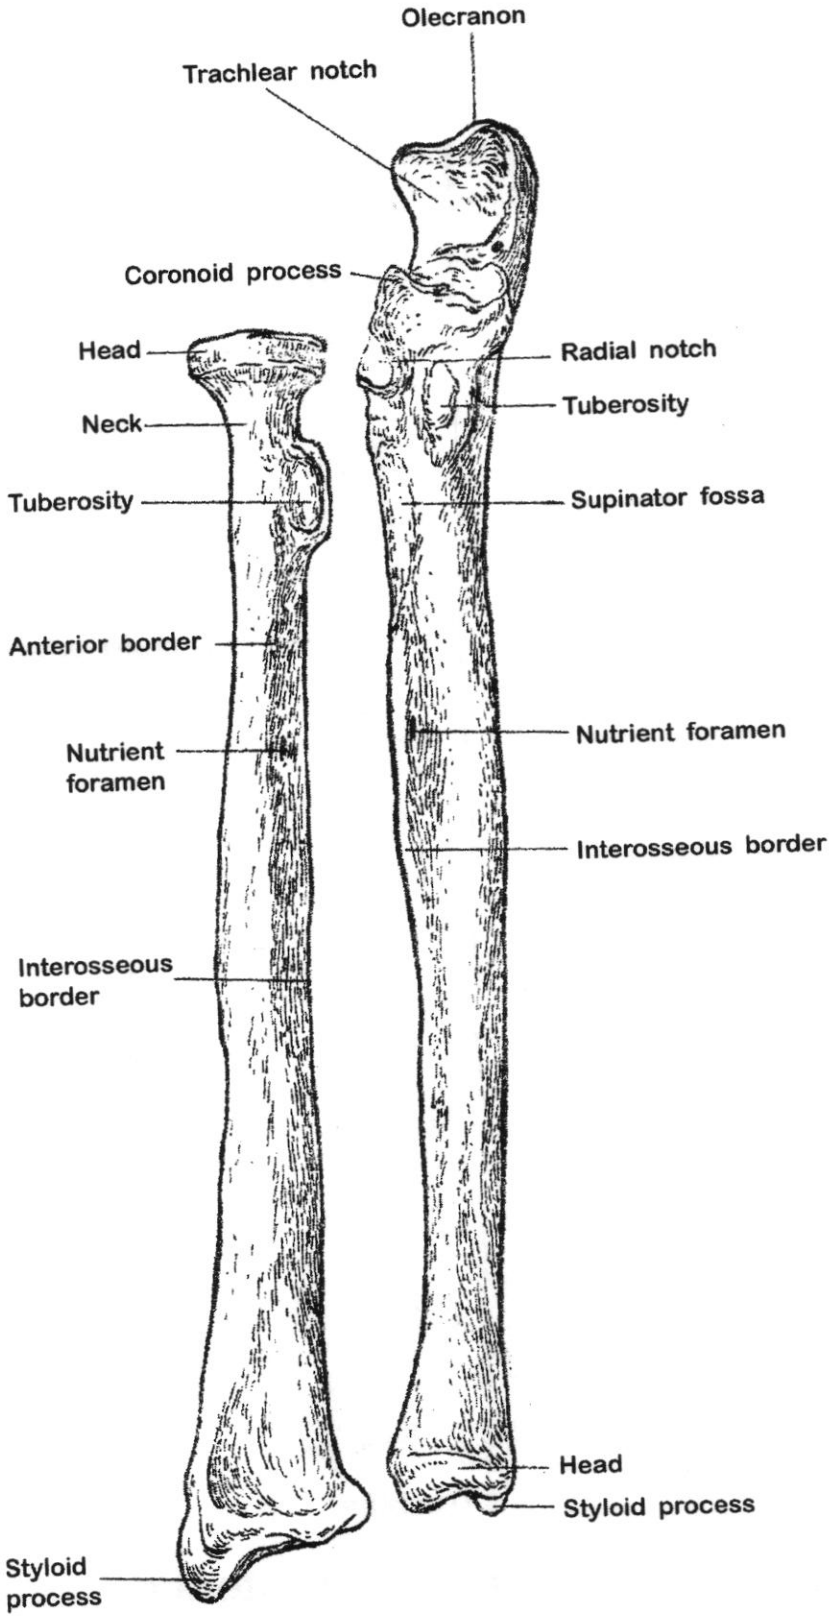

Dorsal surface of right scapula.

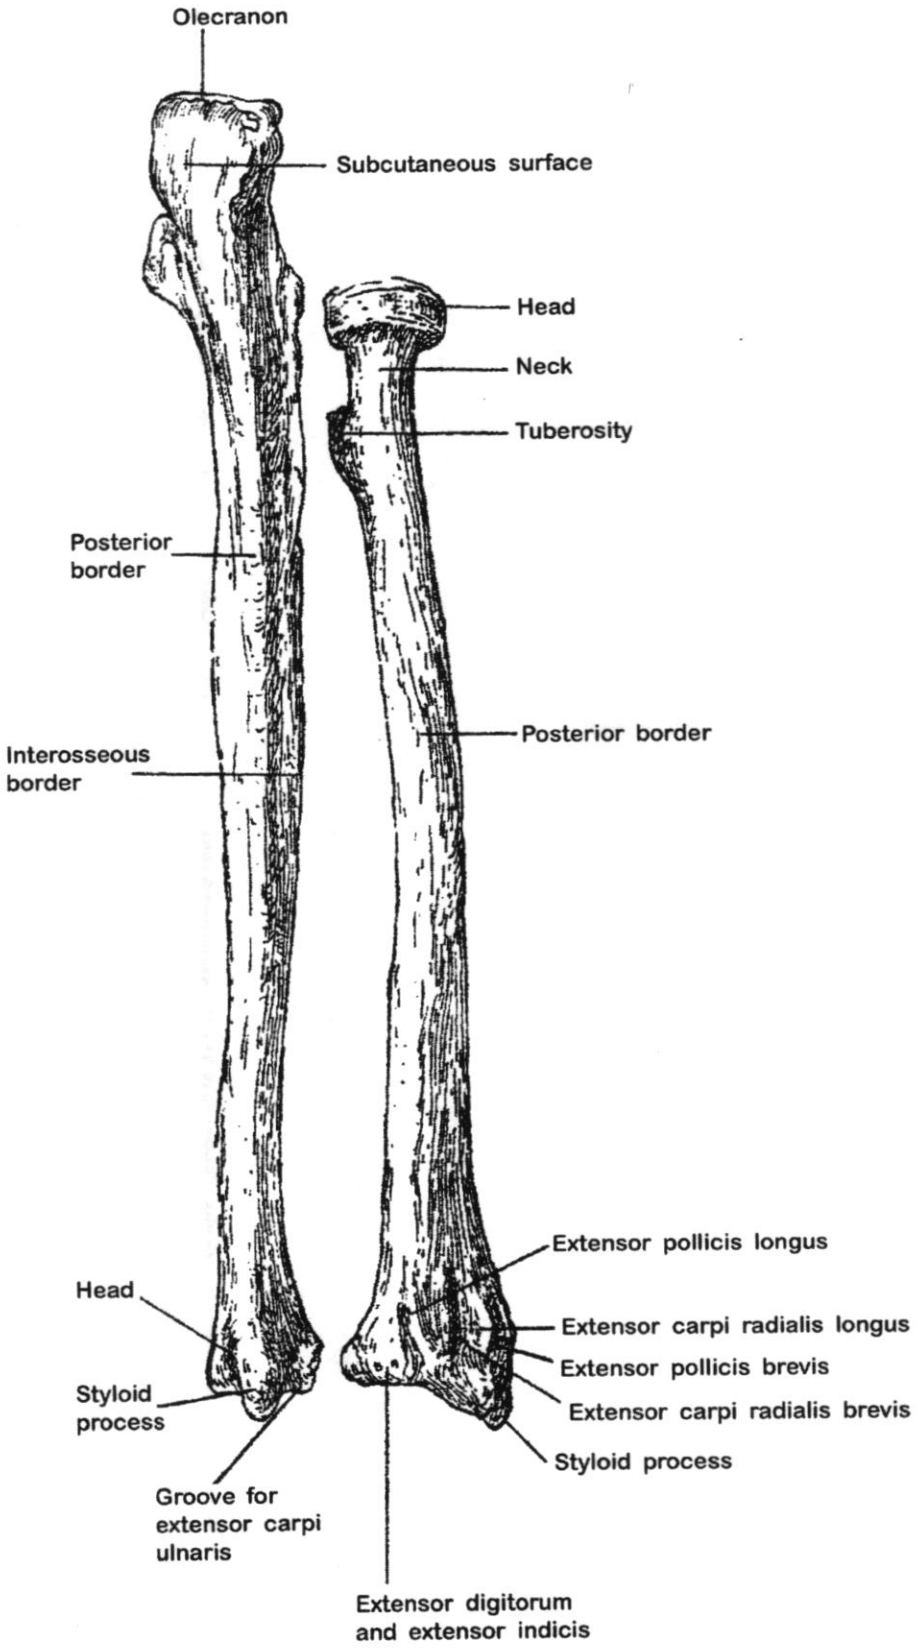

Right humerus (anterior aspect).

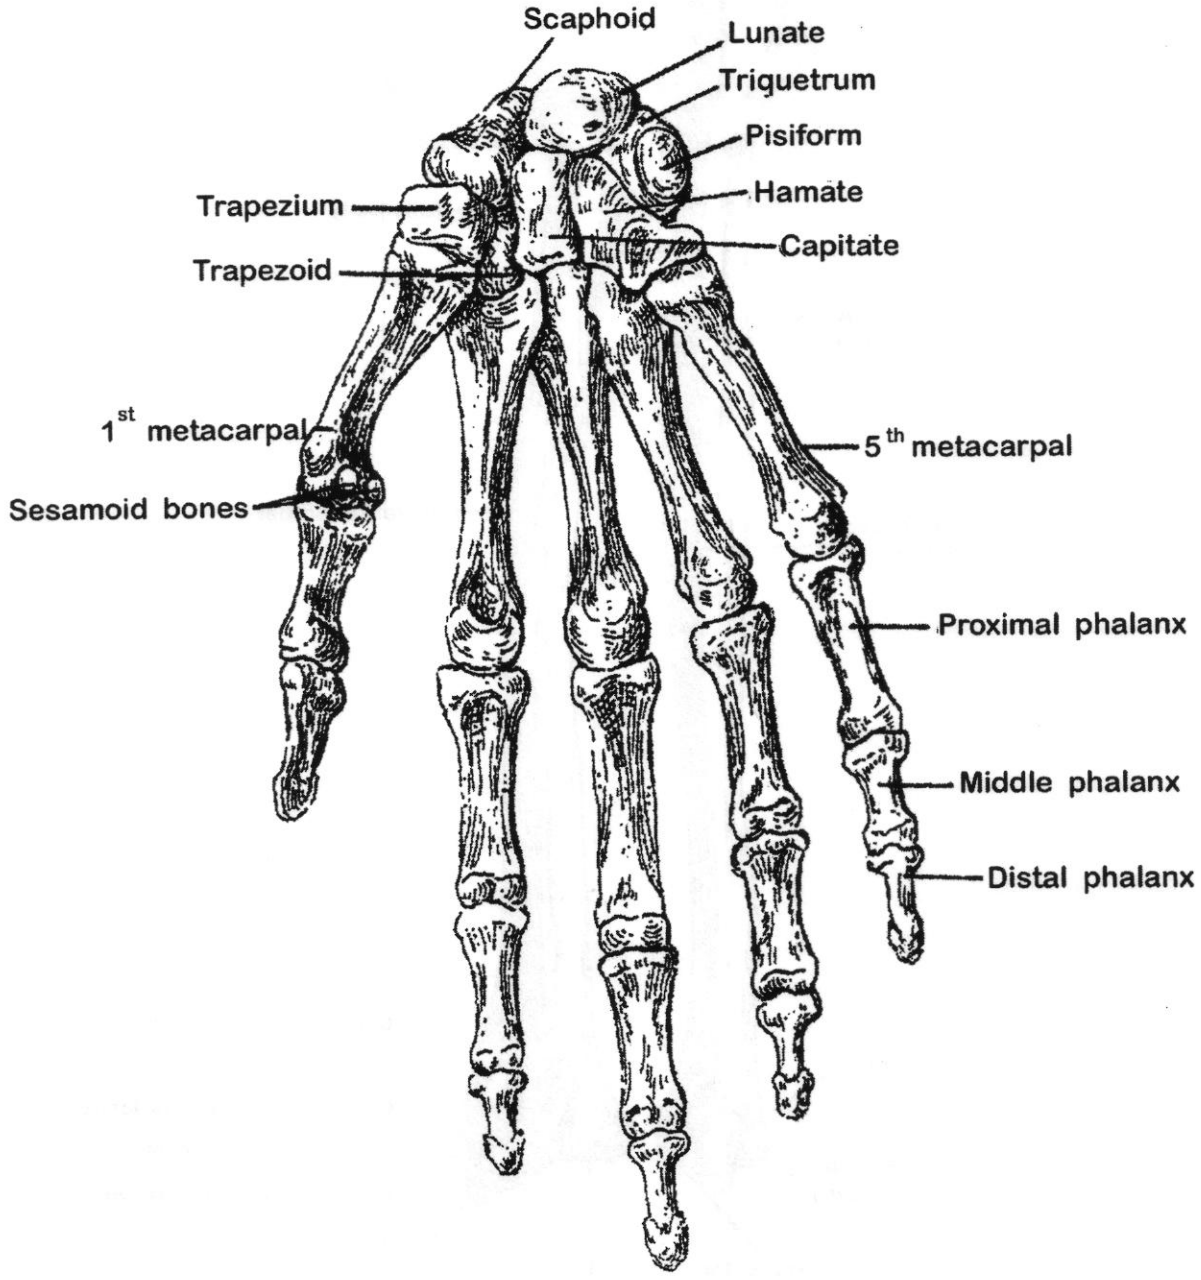

Right humerus (Posterior aspect)

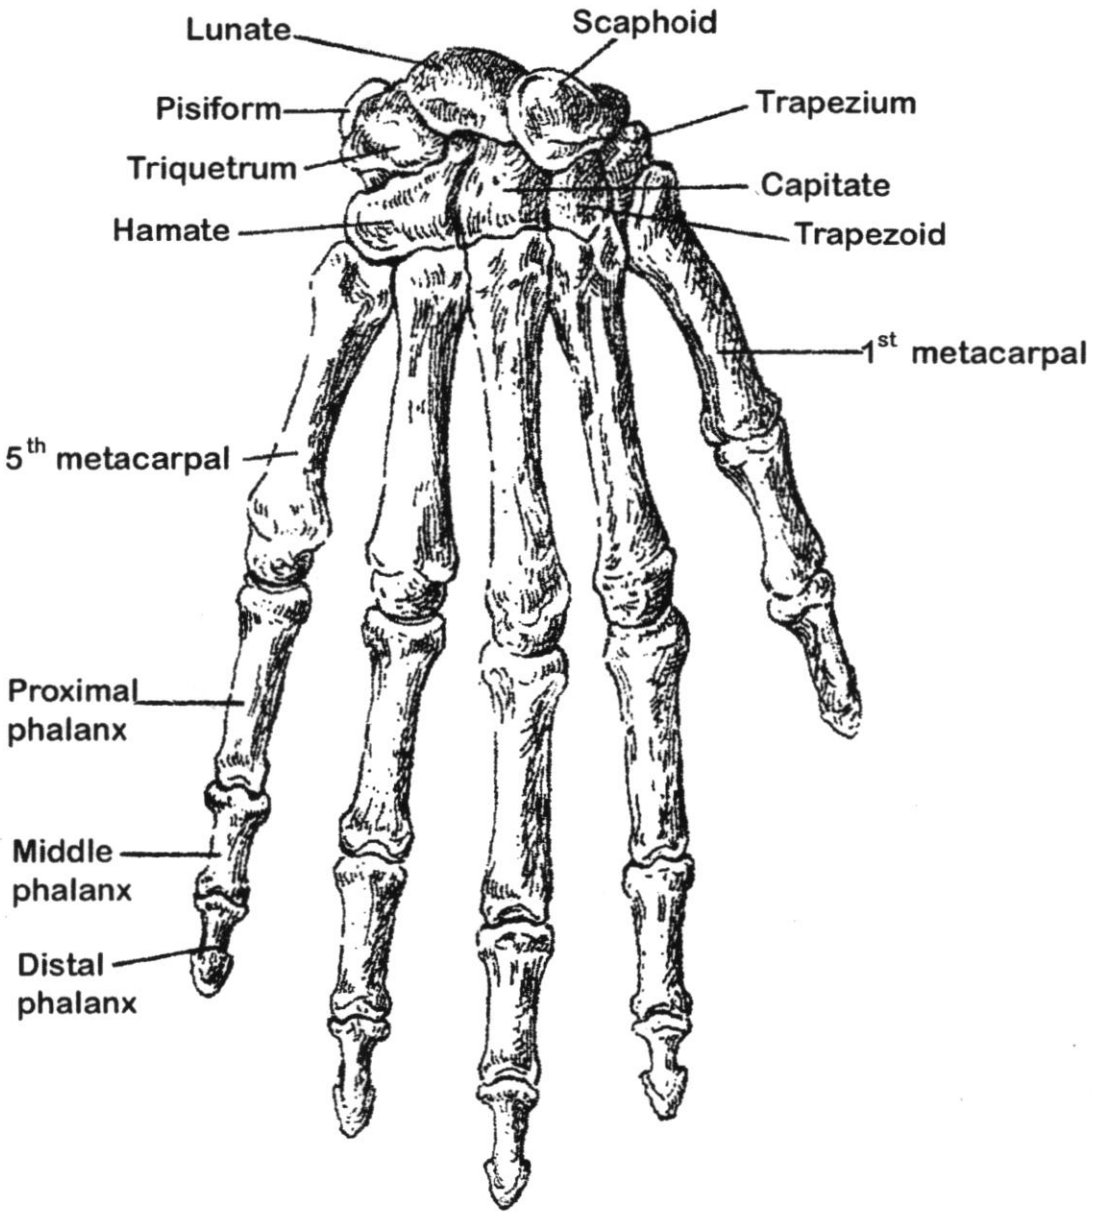

Right radius and ulna (anterior surface).

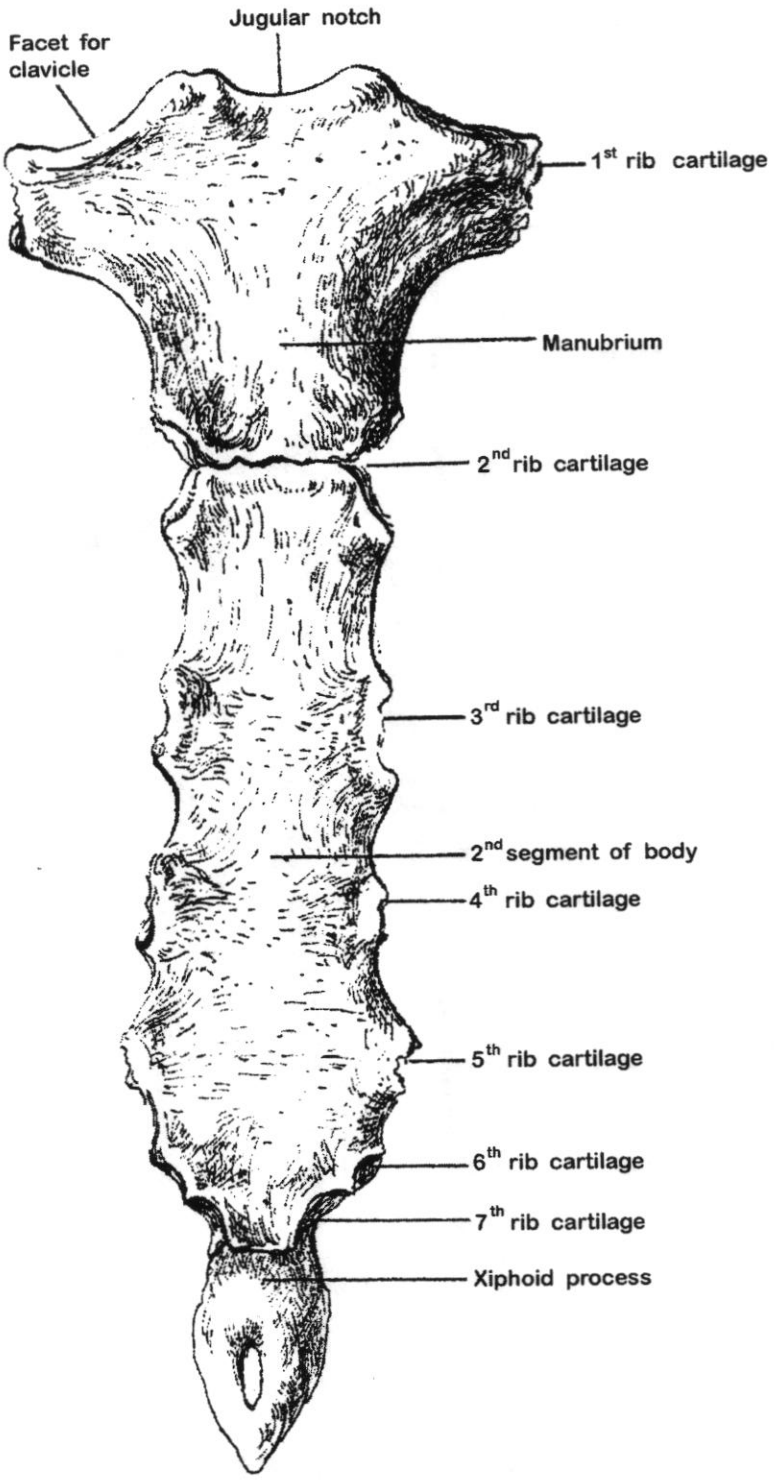

Right radius and ulna (posterior surface).

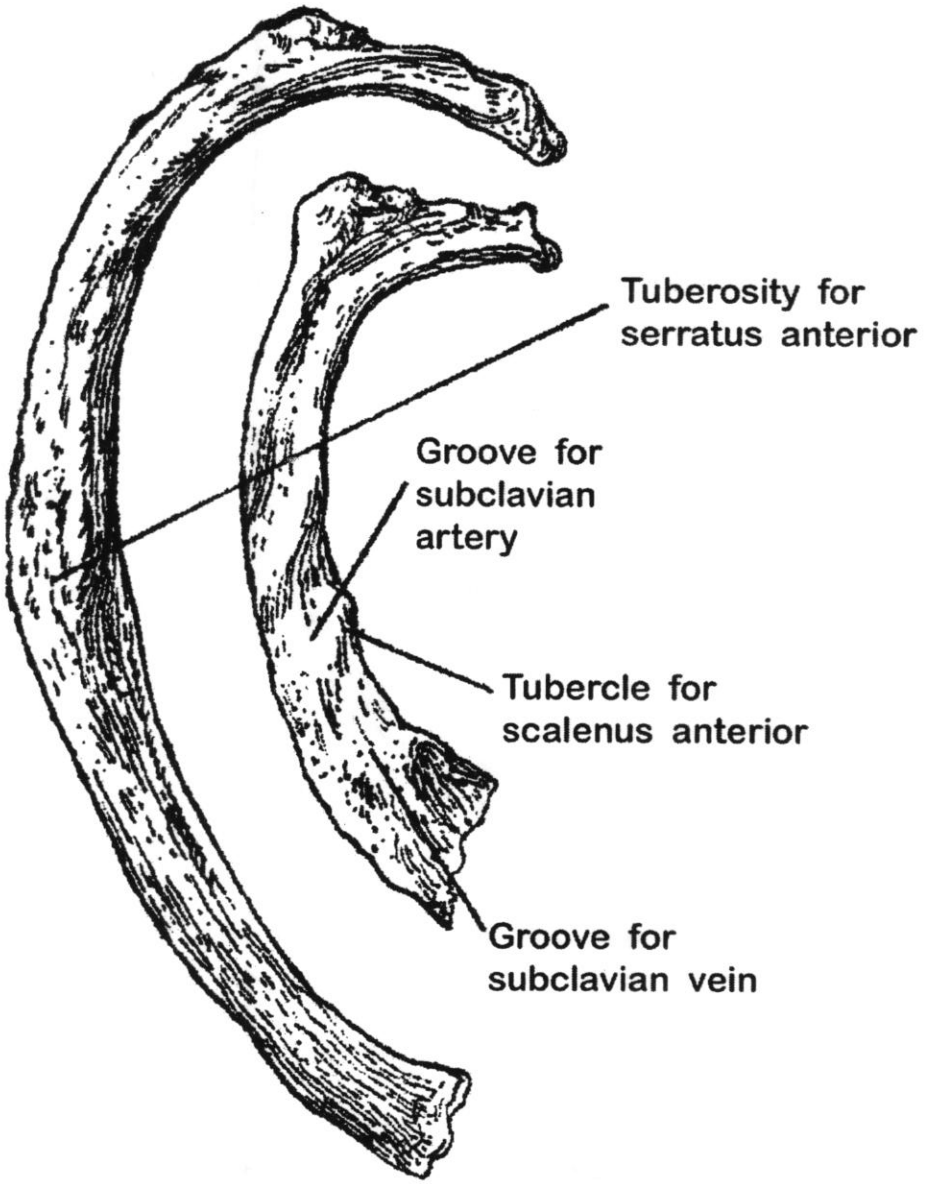

Palmar aspect of bones of right hand.

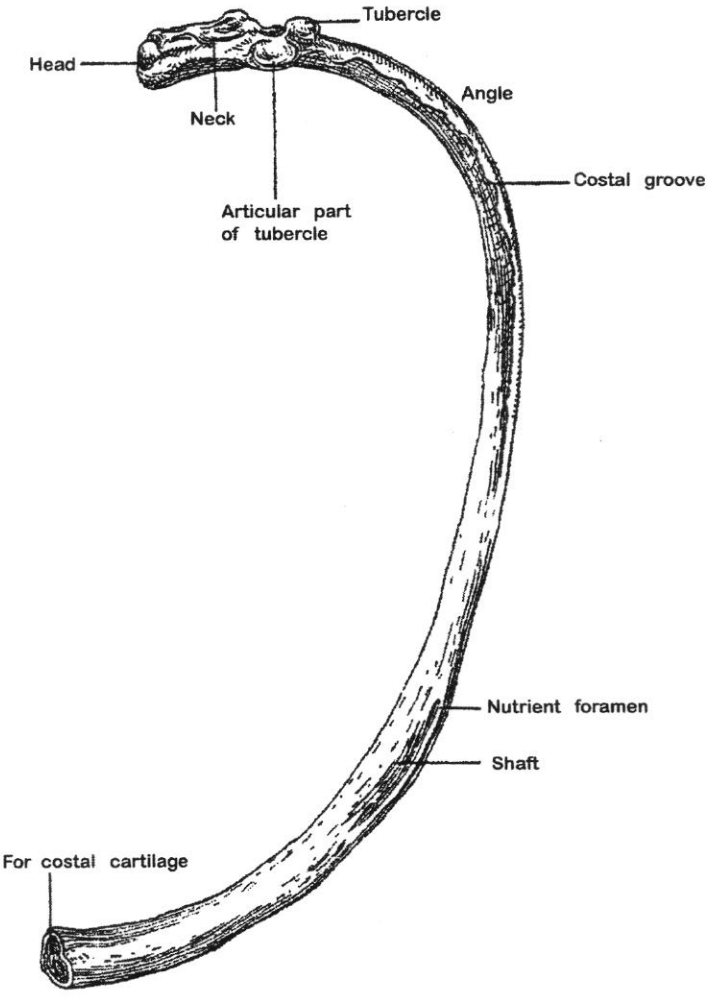

Dorsal aspect of bones of right hand.

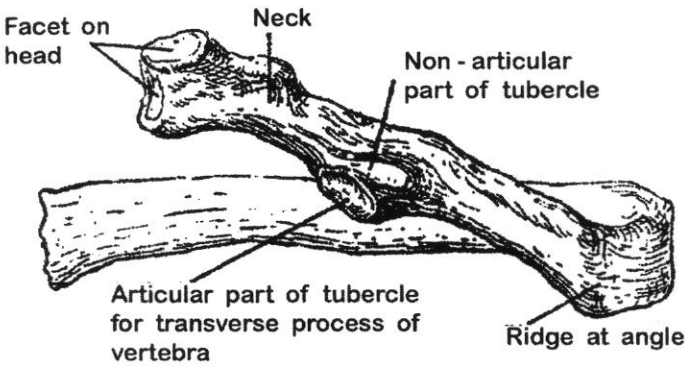

Sternum (anterior view).

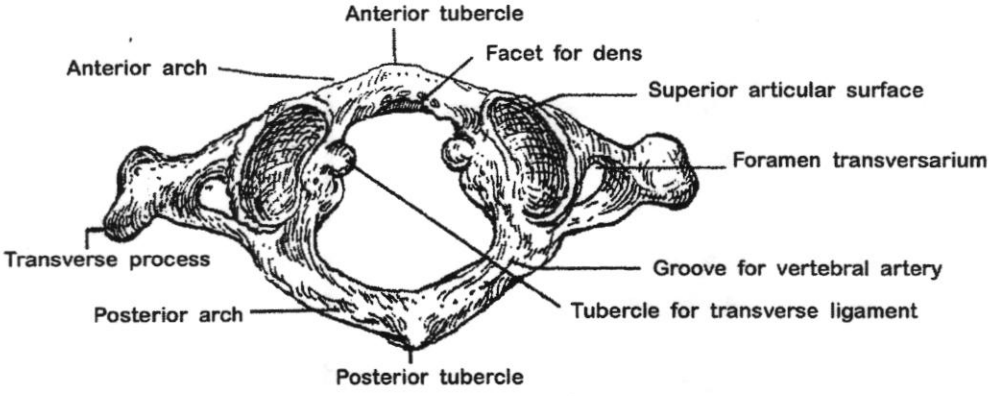

First and second right ribs as seen from above.

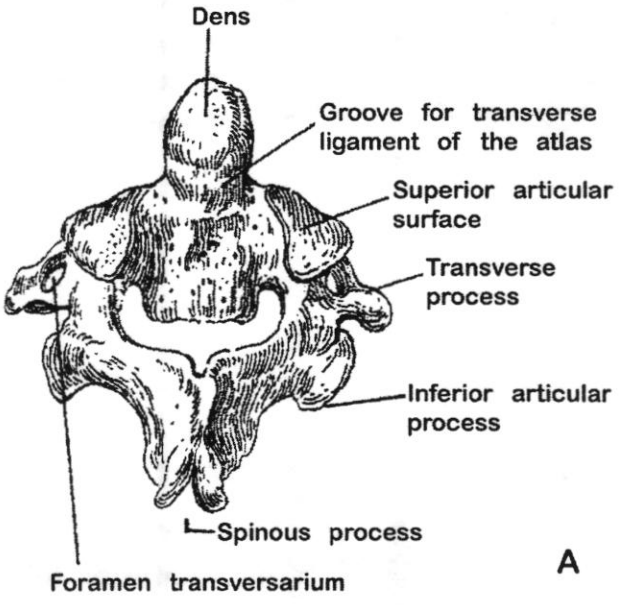

Fifth right rib from below.

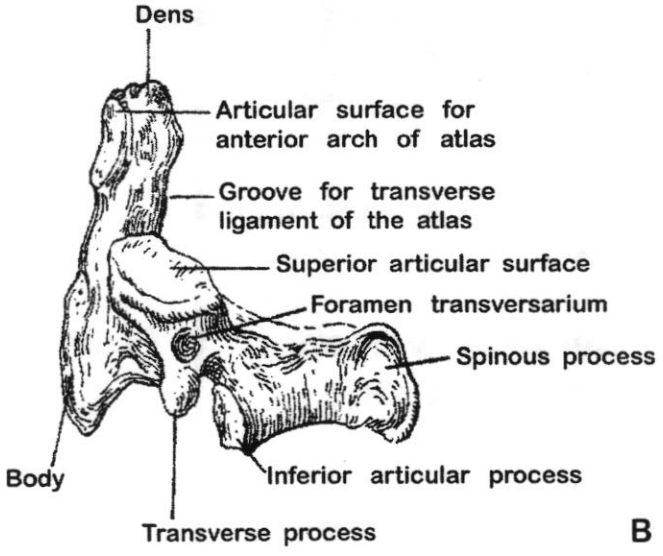

Fifth right rib from behind.

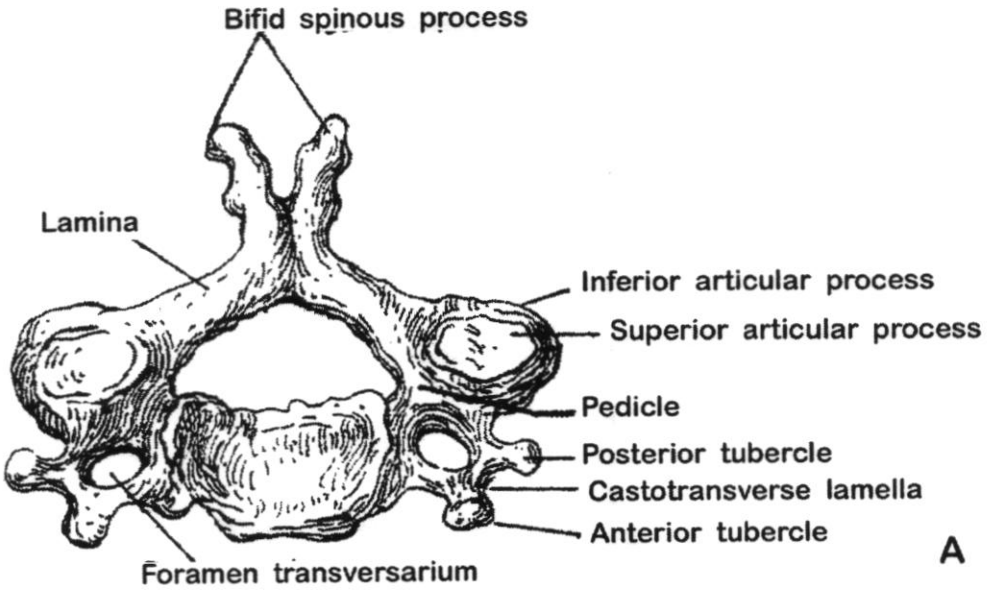

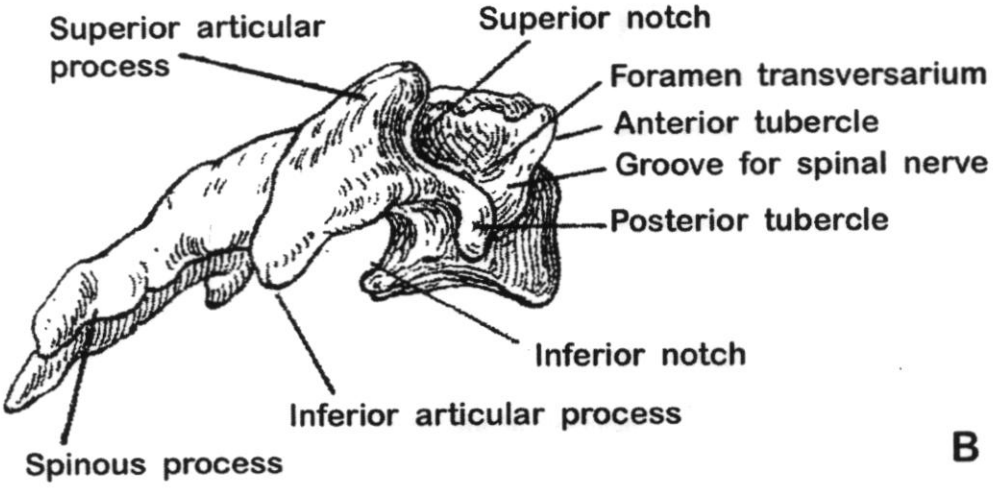

The atlas from above.

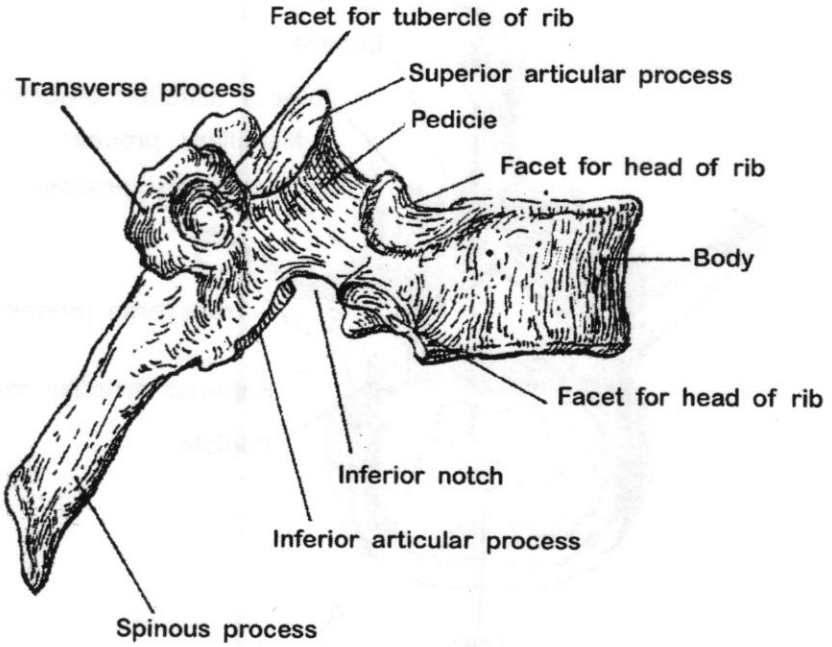

Axis vertebra A, from behind and above; B, from the left side.

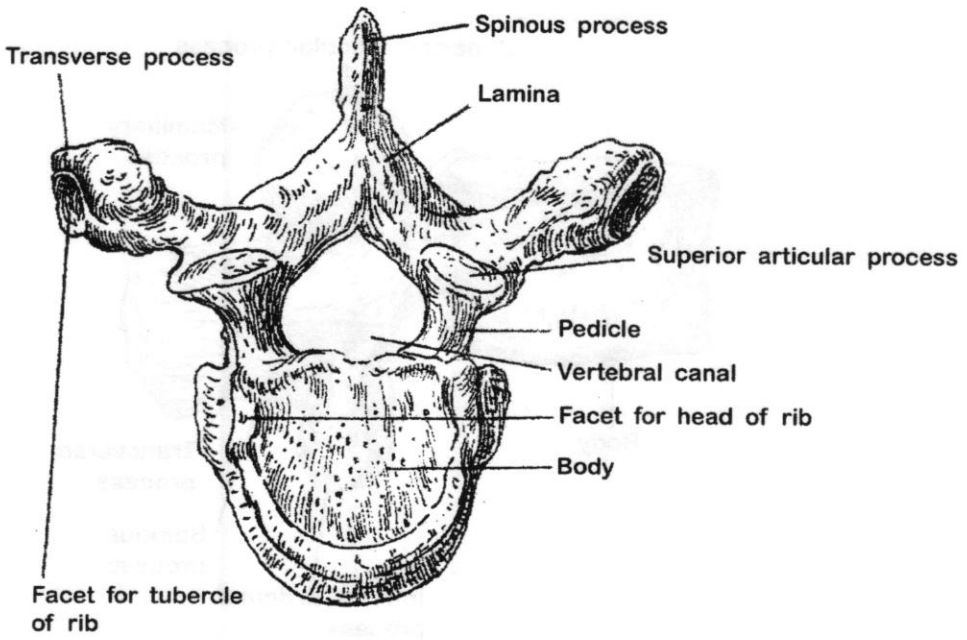

Fourth cervical vertebra. A, From above; B, from the right side.

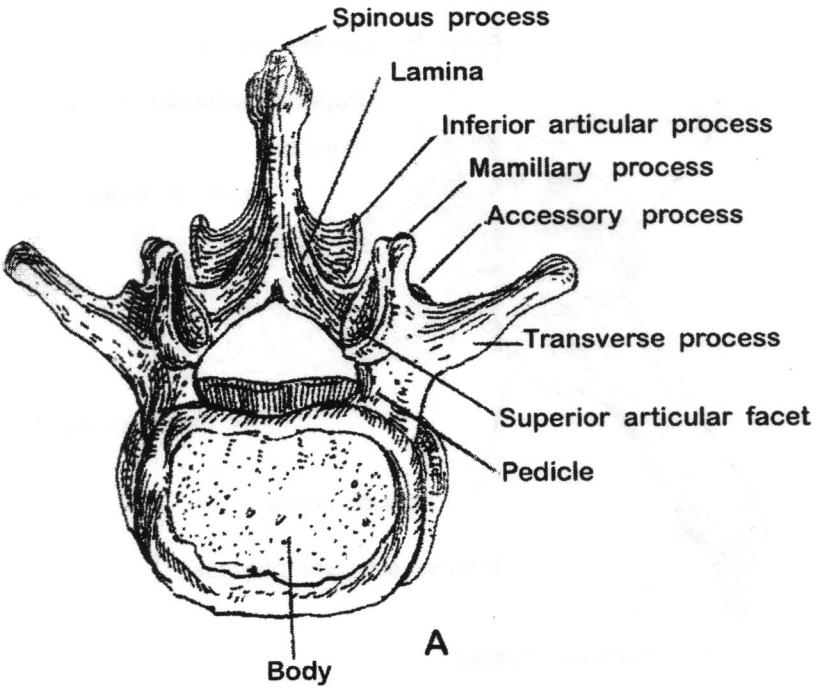

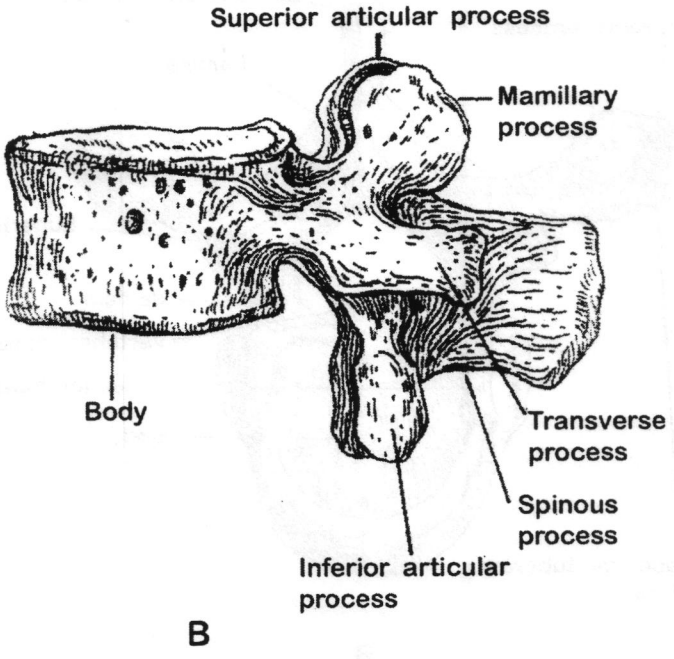

A

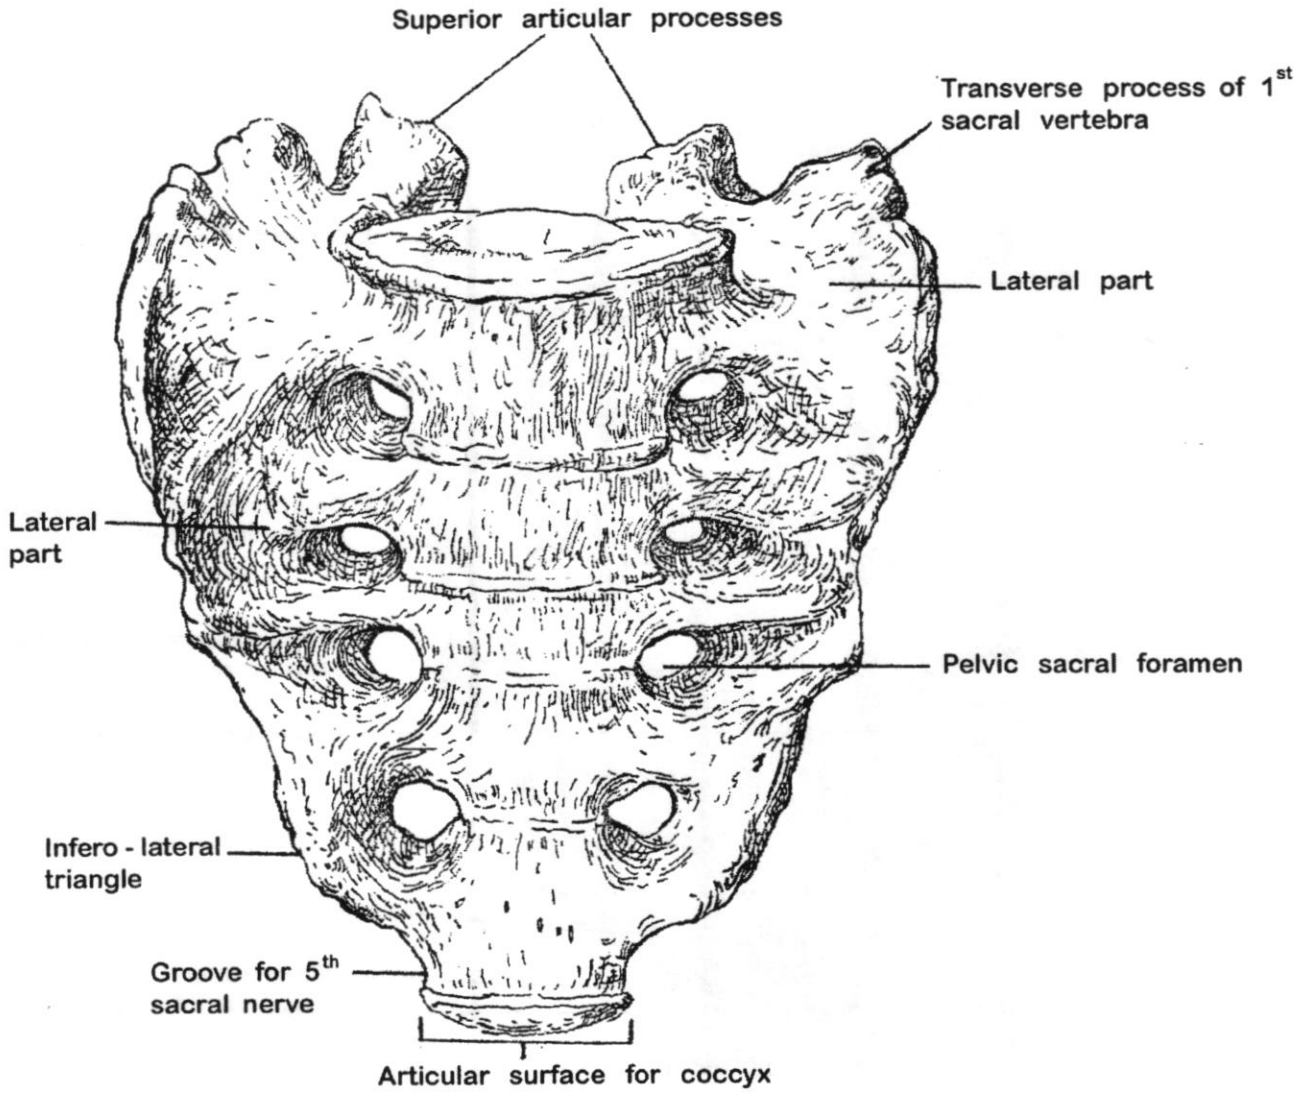

B

Fifth thoracic vertebra. A, As viewed from the right sight; B, as viewed from above.

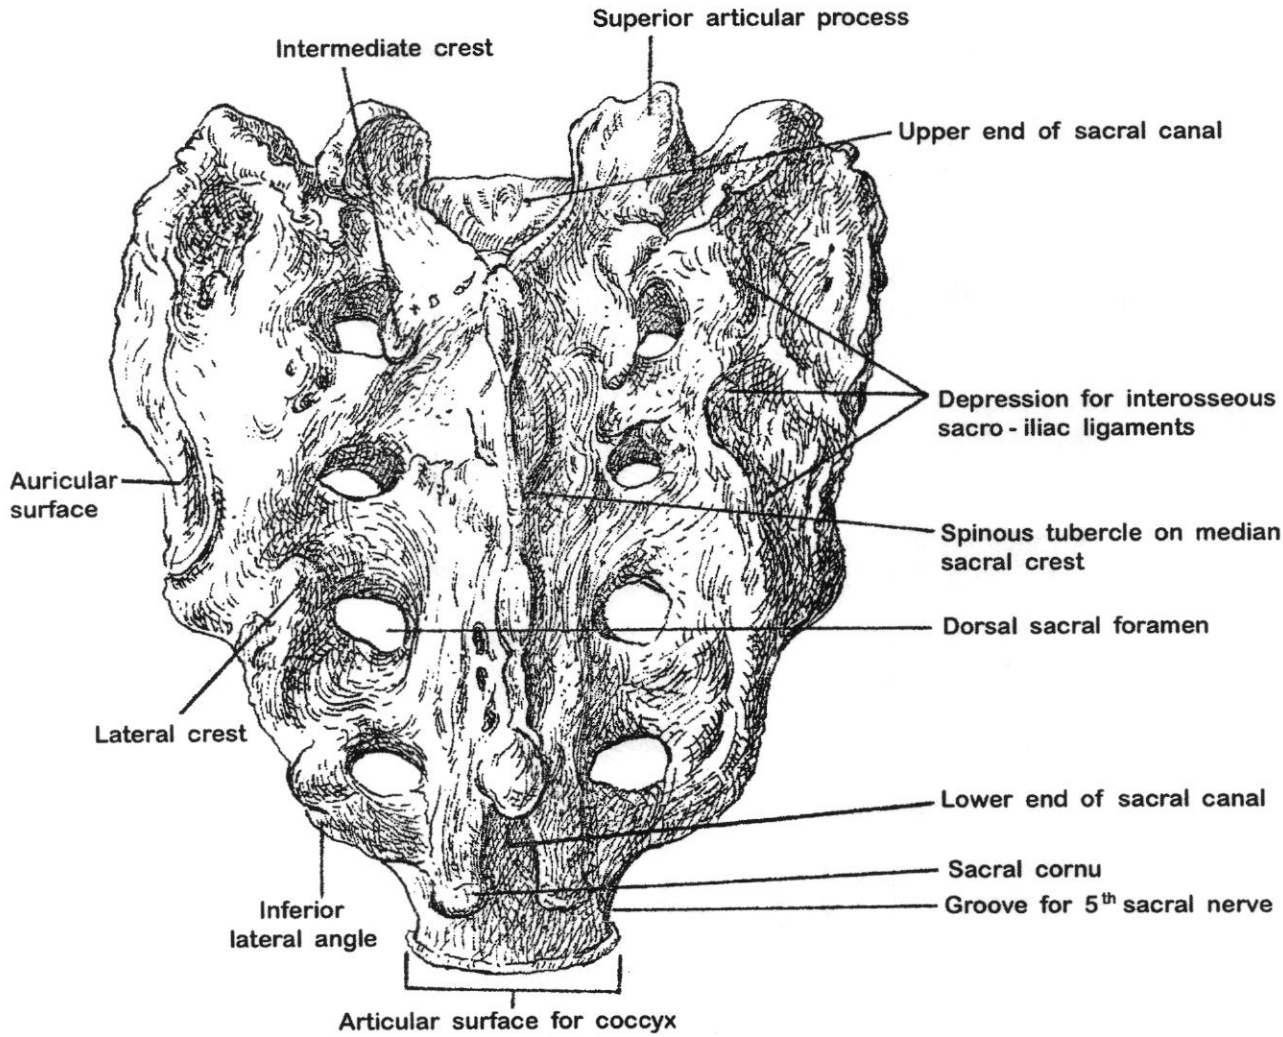

Third lumbar vertebra. A, from above; B, from the left side.

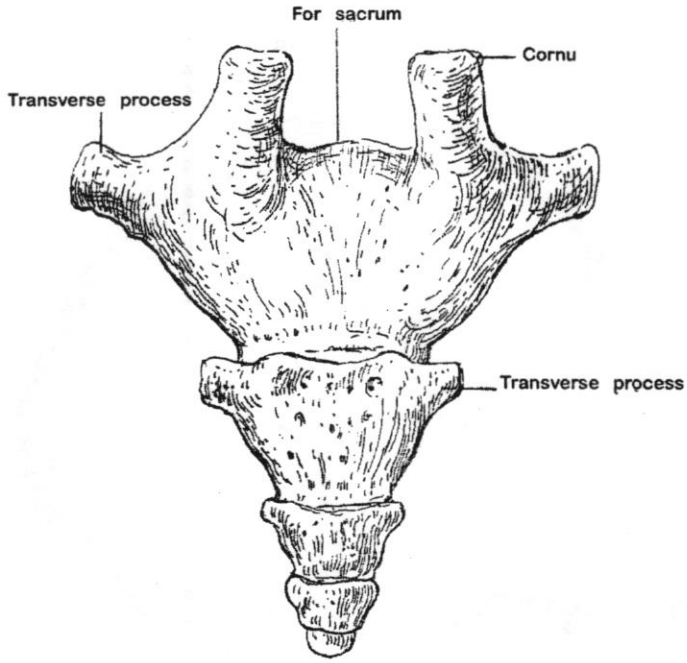

The sacrum (pelvic view).

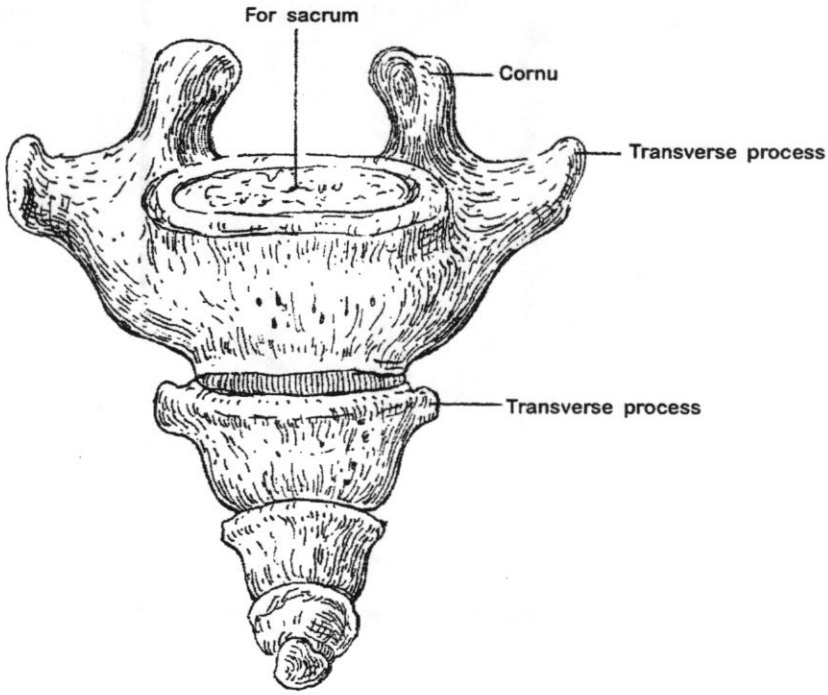

The sacrum (dorsal view).

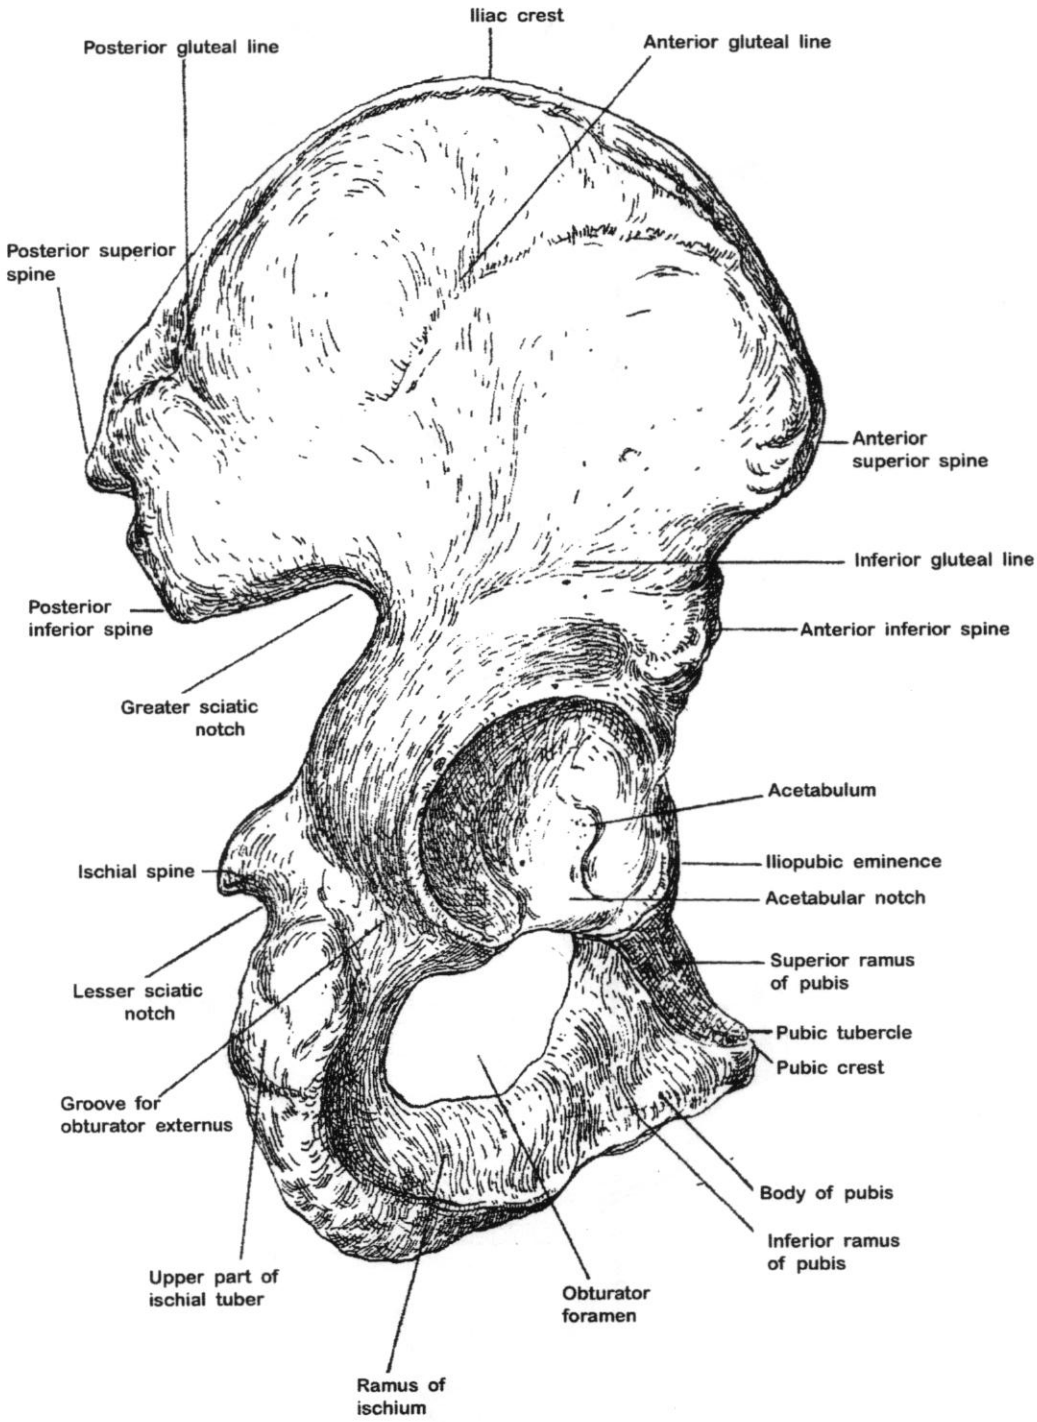

The coccyx

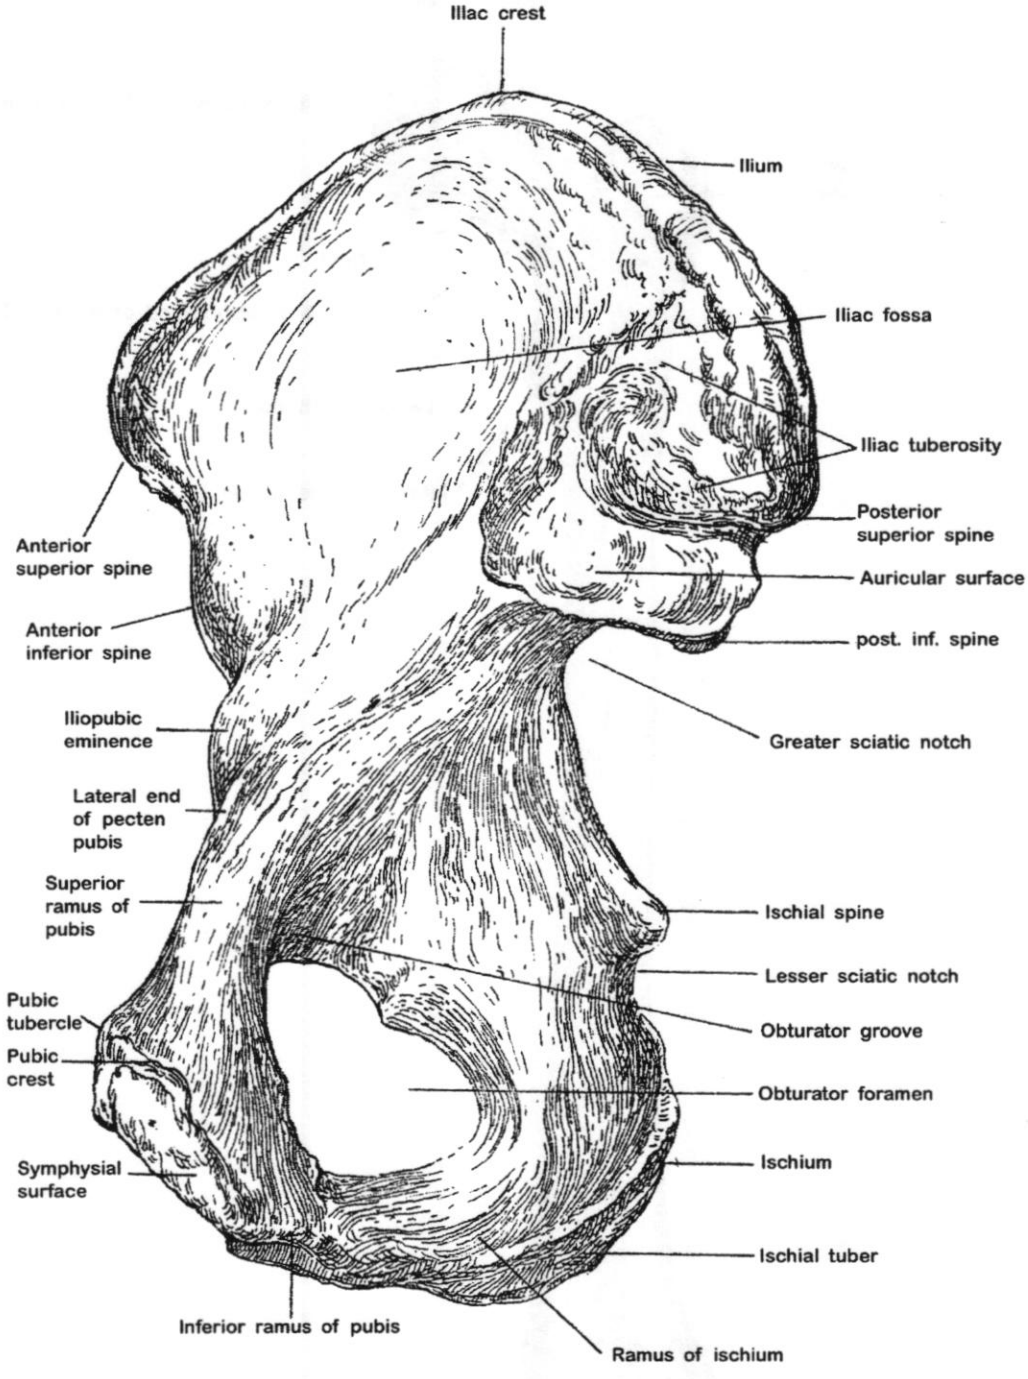

Dorsal surface

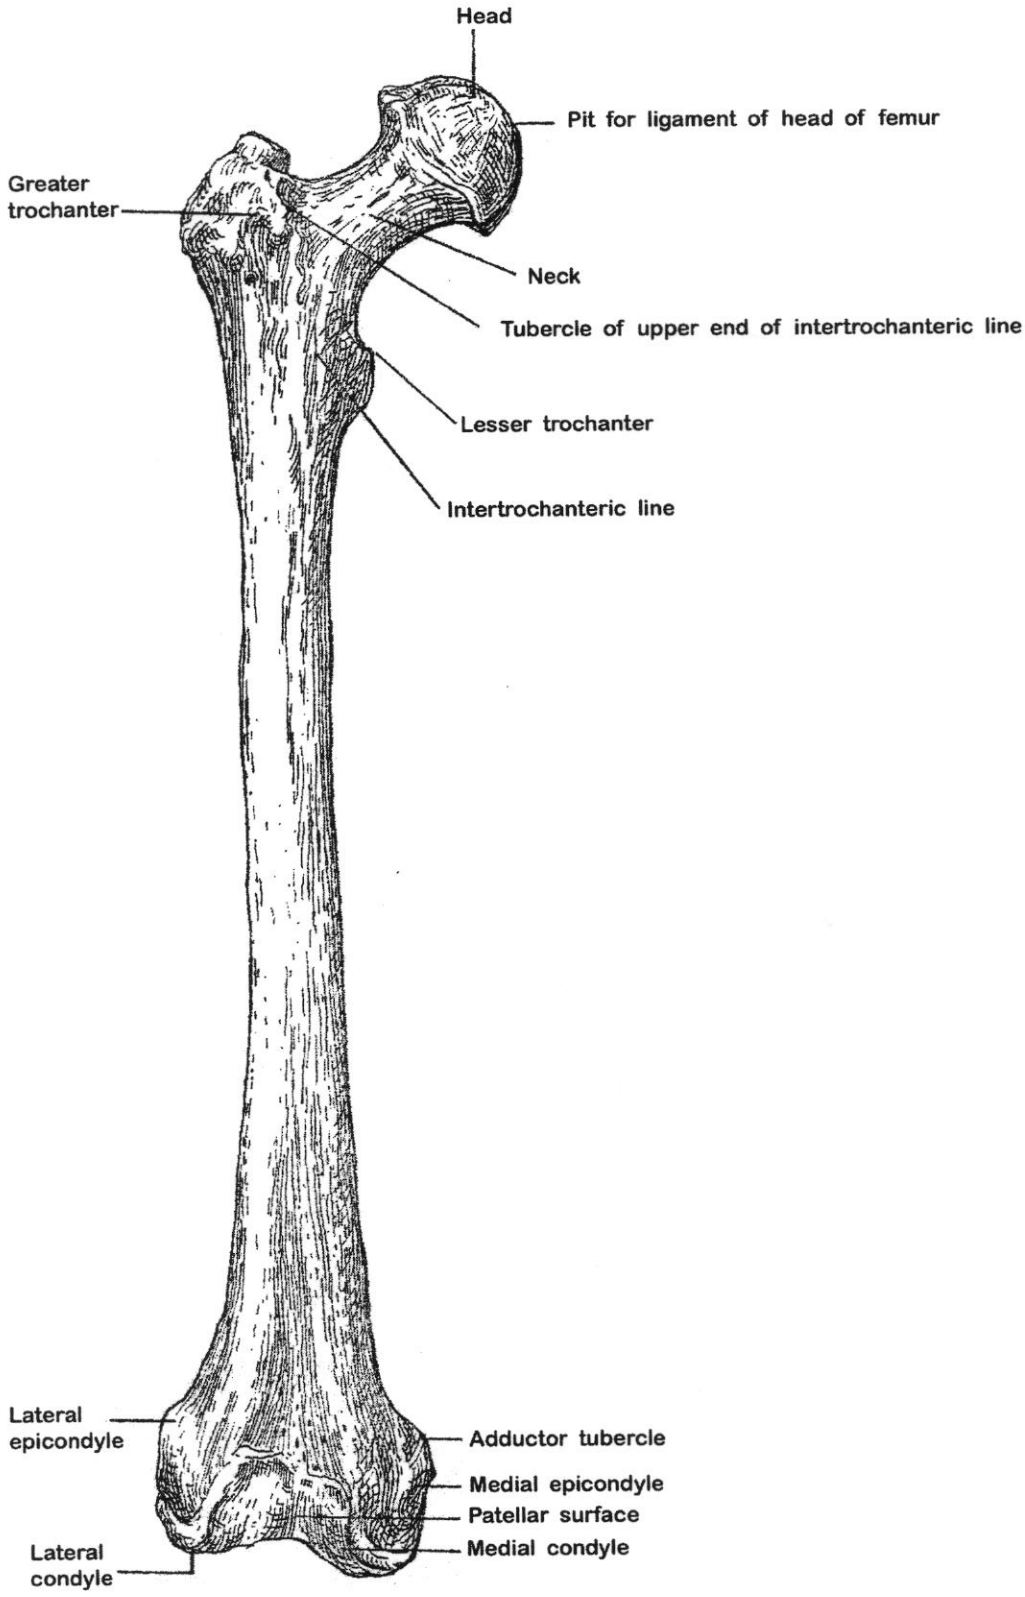

Pelvic surface.

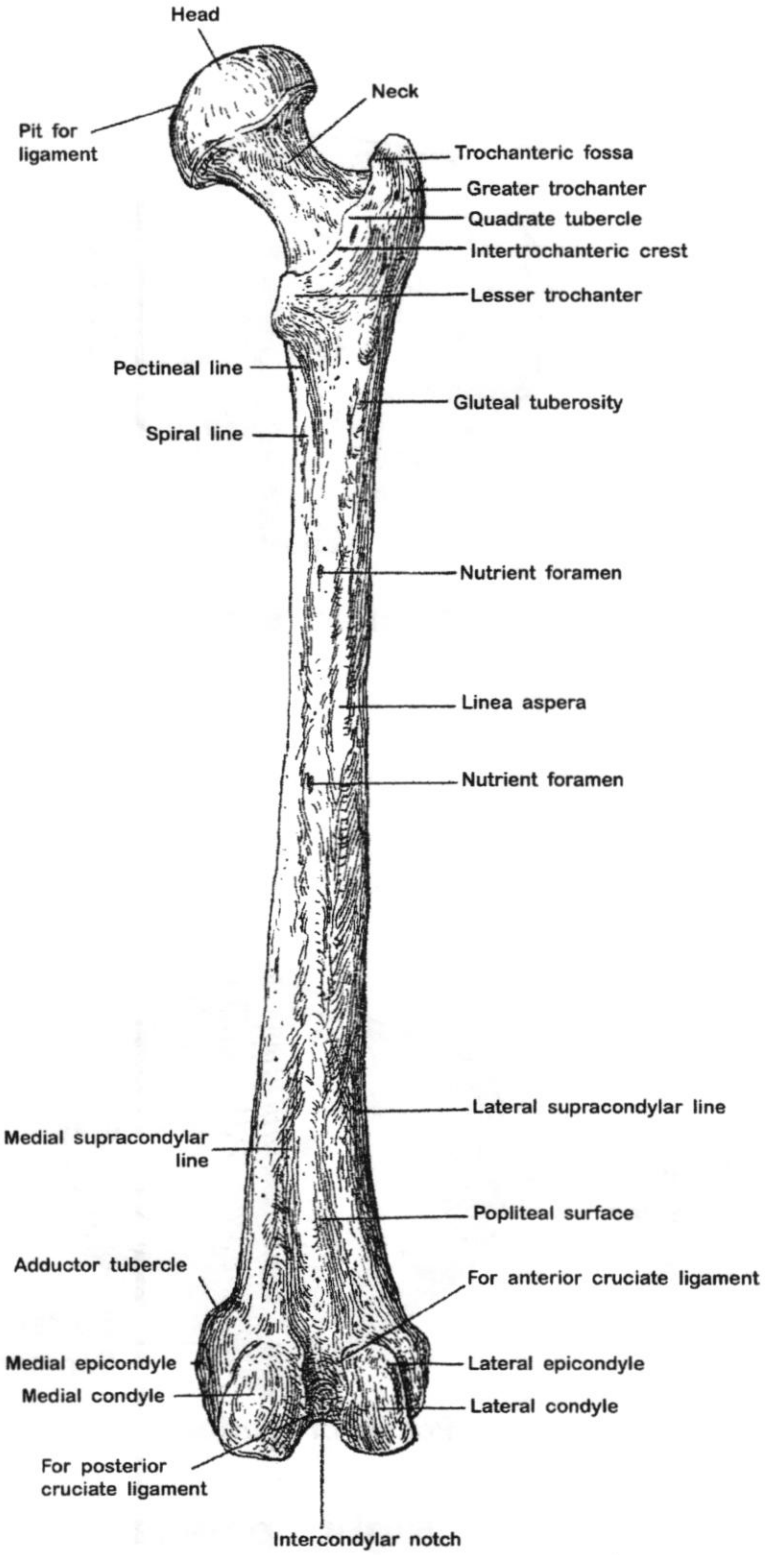

Right hip bone seen from the lateral side.

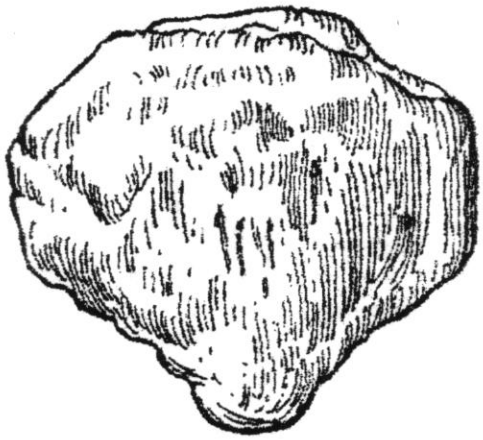

Right hip bones seen from the medial side.

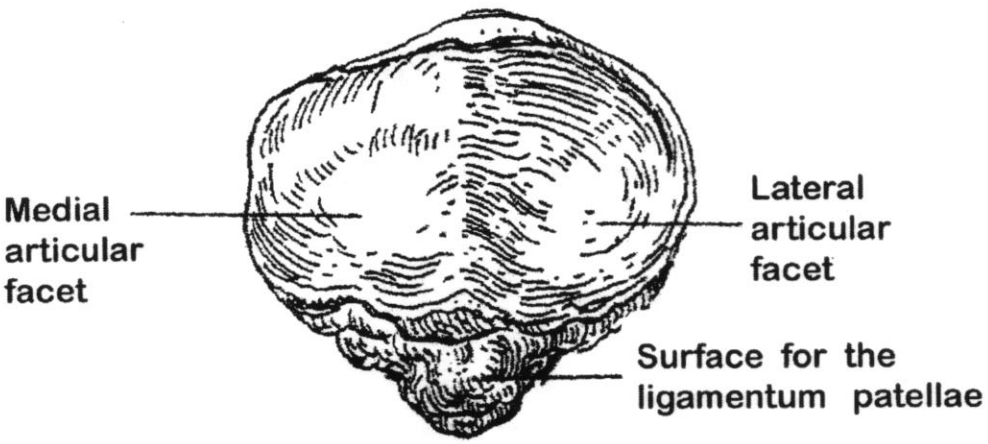

Right femur (anterior aspect).

Right femur (posterior aspect).

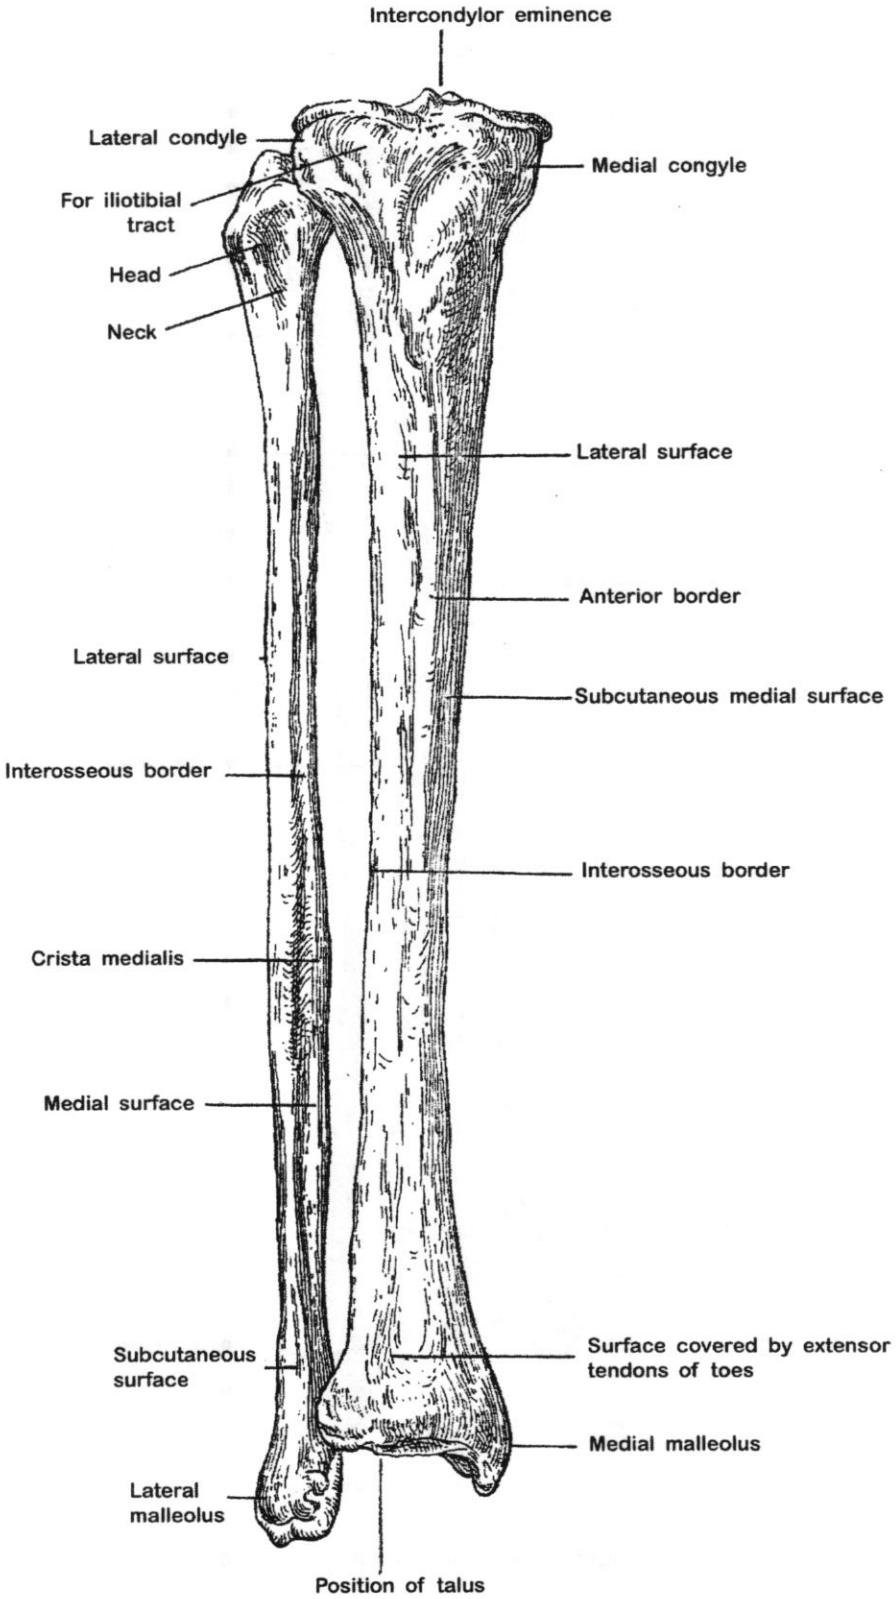

Anterior surface

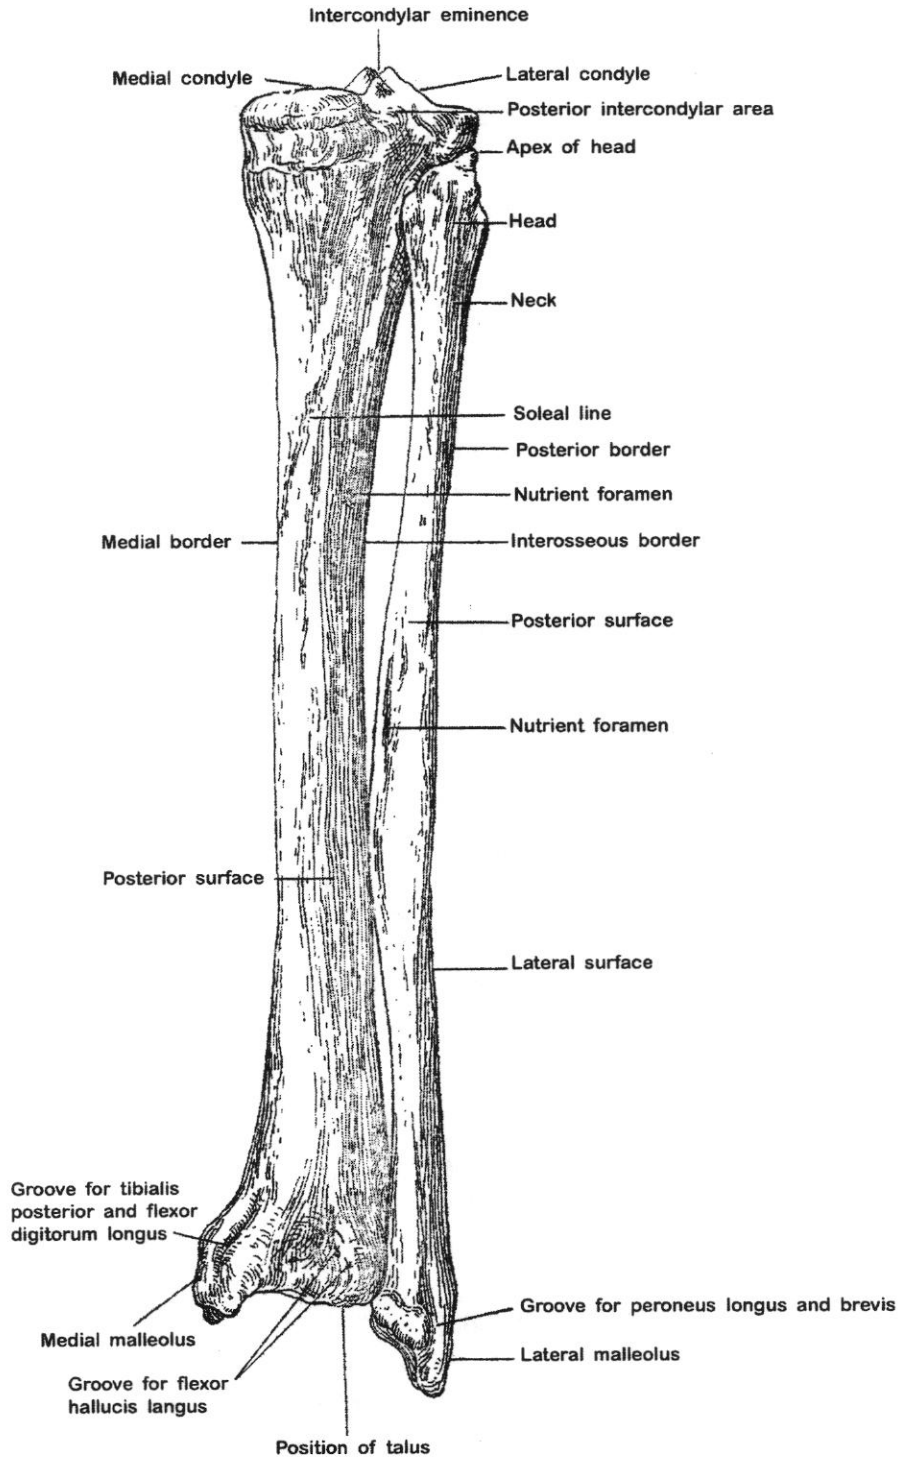

Posterior surface

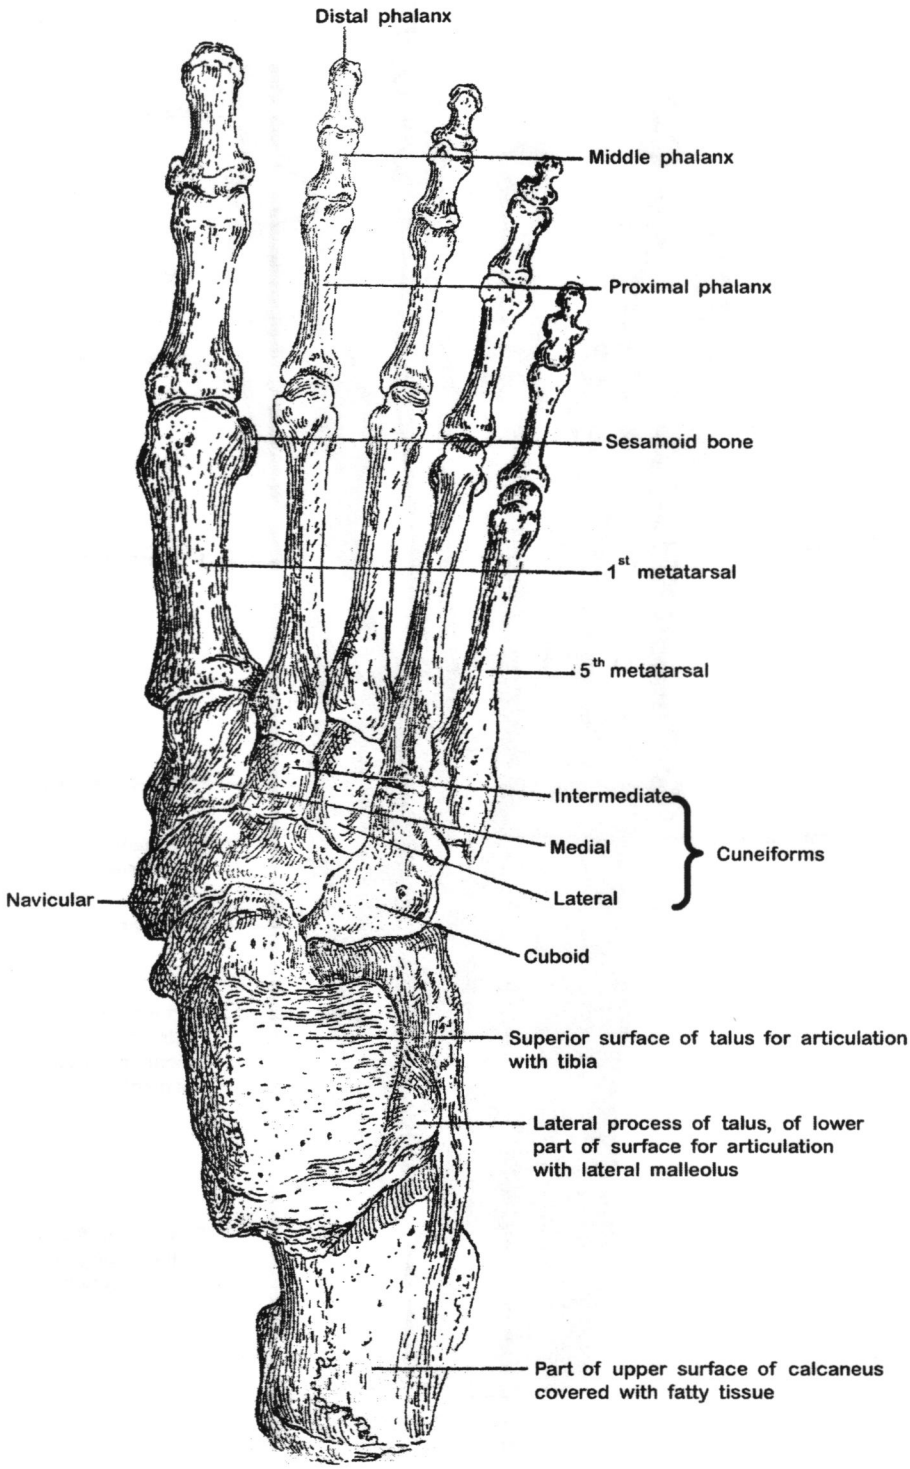

Right patella.

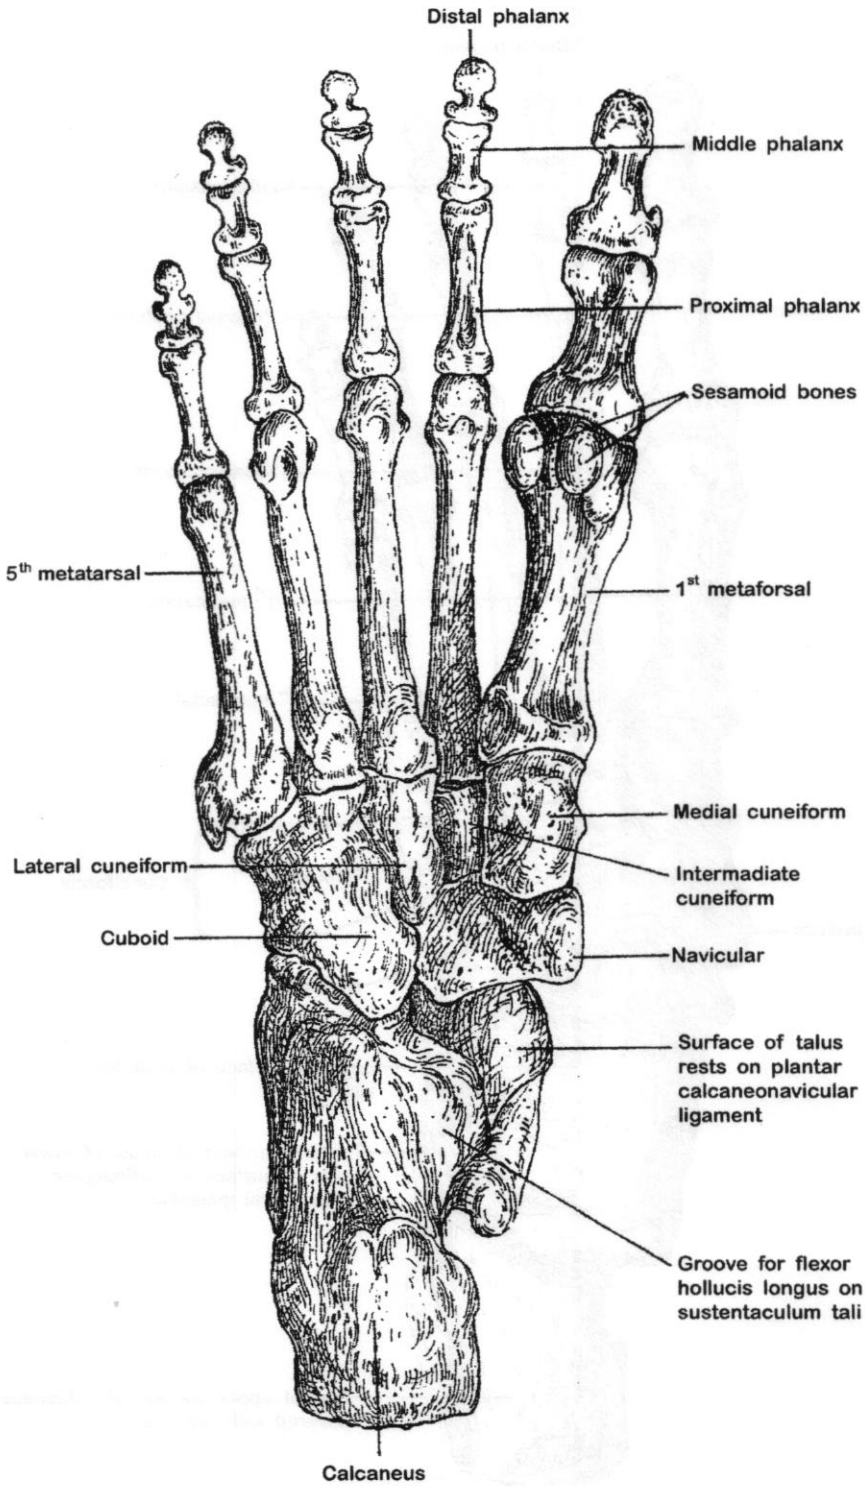

Right tibia and fibula (anterior aspect).

Right tibia and fibula (posterior aspect).

Superior or dorsal surface of bones of right foot.

Inferior or planter surface of bones of right foot.
